Intro

Together We Grow

Our Vision

Financial freedom & independence for the people

Our Mission

Providing tailored infrastructure, tools, and sources to help people achieve financial freedom and independence

Our Core Values

• User Obsession

1. focusing on what users need
2. Supporting and protecting the users
3. Putting users first

• Transparency

We are attempting to build a transparent platform that is easily understood by our users.

• Commitment

We have great dreams and visions, and we are committed to making them come true.

• Passion

We love what we do, and we are trying to be honest, sincere, and passionate in our daily work.

• Humbleness

We know we are not perfect, but we are humble enough to learn and fix the weak points.

Intro

About Coinlocally

Built as a cryptocurrency exchange, **Coinlocally** has grown to become a global hotspot for users aiming to enter the digital asset ecosystem. With iOS and Android applications available for both its spot and futures trading platforms, **Coinlocally** enables users to apply their trading skills, engage with advertisements, and look for the payment method they prefer.

Coinlocally provides a platform for trading and investing in distinctive space-age options such as Demo, Copy Trading & Bot trades, a beginner to pro traders' route that allows users to grow and communicate.

Coinlocally has planned a three-phase process for its development as follows:

- In the first stage, we are going to provide all the tools and features to help users navigate the CEX platform.
- In the second stage, the DEX will be on the road, and
- The final stage will be "Bank Dex."

In the present time, we are in the first stage, and we will announce our roadmap yearly and based on the stages we are working on.

Intro

Genesis

The revolution of Blockchain and crypto has changed the world and divided everything into two categories: "**centralized**" and "**decentralized**," as it has been revealed in two types of money, i.e., FIAT – CRYPTO.

There are basically two types of financial institutions: banks and exchanges, both of which are also divided into "**centralized**" and "**decentralized**."

We strongly believe that banks in the near future will be totally decentralized; therefore, we will need a decentralized platform that involves banks and exchanges.

However, the first step for **Coinlocally** is playing the role of a "decentralized exchange" (DEX), on which we are currently focusing. After the DEX platform, becoming a "**Decentralized Bank**" is our future plan, which we are working on. (The information will be published soon.)

Although DEXs (Decentralized Exchanges) have started lately, we strongly believe they will be many times bigger than "Centralized Exchanges" in the near future. They will play much more important roles in the world of finance and crypto.

With your collaboration and help, **Coinlocally** will be able to build the highest level of crypto Decentralized Exchange (DEX), which can let all users across the world access a new generation of exchange that empowers the future of crypto and fiat finance.

We believe that through decentralization, and especially Web 3.0, we will ultimately be able to provide real financial independence and freedom for the people to have 100% control over their assets without any outside or external monitoring, as people must be able to have full control over their belongings and assets.

There will be many features and tools to let them store, spend, stake, etc., or, in general, decide for their financial affairs, even for their daily expenses.

2022 Road Map

What We Have Done

What is next

2023

Q2

Bot Trading

It is going to automate trading processes like selecting, buying, and selling cryptocurrency in accordance with predetermined criteria established by the bot's programmer or inventor.

Q4

Profit Sharing

This profit-sharing model will allow token holders of a project to get rewards or profits only for keeping their tokens.

Q1

Copy Trading

Launching this platform will allow the users to automatically copy positions started and managed by specific third parties.

Q3

Social Trading

It will enable the investors to track the trading activities of both experienced and new traders so that they can imitate or mimic their trading tactics in order to follow their investment strategies.

2024

H2

Coinlocally's DEX Network

In line with a progress of network plan, Coinlocally will have its own specific DEX network.

H1

Converting CLYC into a Coin

Coinlocally's Token (CLYC) will be converted into a coin and will be running on Coinlocally's official network.

Intro

Products

Coinlocally was officially launched in late 2021, and based on the first version of its whitepaper at that time, we achieved all our goals announced in the roadmap by providing:

- **Fiat/ Crypto**

Users can buy and sell cryptocurrency with more than 60 different fiat currencies.

- **Spot Trading Platform**

A platform for various orders, such as LIMIT and STOP.LIMIT – MARKET – OCO to let professional users trade their crypto based on USDT and BTC.

- **Futures trading platform**

A platform that will be available on USDT, BTC, and CLY, as well as FIATs, with a maximum leverage of 120x.

- **Staking**

It allows holders and investors to take profits from their holdings. In this way, their crypto can be used to verify their crypto network transactions, which allows participants to earn rewards on their holdings.

- **Demo Trading**

A demo account enables new investors to familiarize themselves with real trading procedures and learn what to watch out for while transacting with real assets and securities. Before adding money to their account or making trades, investors can test out a trading platform using a demo account.

- **Coinlocally NFT Marketplace**

It is a platform which brings Creators, Artists, Crypto NFT Community, .

Intro

all together, to exchange, Create and Trade premium & unique NFTs They can Buy and Sell their NFTs as they wish. We are also going to announce our zero-fee commission on August.

- **Copy Trading**

Copy trading allows users to automatically copy positions started and managed by specific third parties. Copy trade connects a portion of the copying trader's funds to the account of the copied investor, in contrast to mirror trading, a technique that enables traders to copy particular techniques.

- **Bot Trading**

A crypto trading bot is a software program that automates trading processes like choosing, purchasing, and selling cryptocurrency in accordance with predetermined criteria established by the bot's programmer or inventor.

- **Profit Sharing**

An incentive model known as the profit-sharing model for cryptocurrency allows token holders of a project to get rewards or profits only for keeping their tokens. These tokens' earnings are derived from the project's own earned income.

- **Social Trading**

A type of investing known as "social trading" enables investors to track the trading activities of both experienced and new traders. The main goal is to imitate or mimic their trading tactics in order to follow their investment strategies. Little to no financial market knowledge is necessary for social trading.

- **P2P**

A peer-to-peer platform is for connecting users to each other directly to buy and sell their crypto at their own price and based on their own choice of fiat.

Intro

- **Academy**

Coinlocally Academy is a nonprofit blockchain education portal that offers quality, easy-to-understand content for cryptocurrency users and enthusiasts worldwide. The content provided for the users involves daily crypto hot news, blogs holding useful specific materials regarding terms, jargon, etc., as well as tutorials and educational content.

- **Margin**

Margin trading is the practice of covering a deal with borrowed funds. Therefore, the primary distinction between margin trading and spot trading is that the former enables the trader to open a position without having to cover the entire cost out of their own pocket.

- **Pool Mining**

A mining pool is a collection of miners who share or pool their resources, like computing power, through a network as opposed to mining separately. Joining a mining pool is a far more profitable way to mine coins because the difficulty rises with each coin awarded. If you want to be competitive, it's best to join a pool unless you have the funds to build your own or purchase numerous cutting-edge ASIC miners.

- **Battle**

A trade battle is an economic dispute that frequently results from severe protectionism in which states impose higher tariffs or other trade barriers on one another in retaliation for the other party's trade restrictions.

- **Gaming**

Using blockchain technology and powered by cryptocurrencies and NFTs, video games that allow players to earn GameFi tokens are accessible on the Play to Earn platform. With GameFi games, you may take advantage of the gameplay while also earning cryptocurrency. Learn about the newest and most well-liked NFT games as well as play-to-earn cryptocurrency games.

Coinlocally Coin (CLYC)

Coinlocally plans to release its coin, called "**Coinlocally Coin**" (**CLYC**). A rough amount of 1 billion CLYC will be created and will never be increased. CLYC will be run on the **BEP20** blockchain network. (Currently, CLYC is considered a token running on **BEP20** network, but it will soon be converted into a coin and will be running on Coinlocally's network)

Allocation / distribution

Coinlocally Coin (CLYC)

Release schedule

Coinlocally Coin (CLYC)

Usage Case

- **Trading fee**

Through this token, there will be discounts allocated for all the trading activities.

- **Listing fee**

We will list new coins, tokens, and other assets on Coinlocally platforms, which may have an associated listing fee.

- **Withdraw fee**

There is only a small fee for withdrawals that might be different depending on each network and crypto.

- **Staking**

By staking and saving this currency and the cooperation they have with Coinlocally, users would be able to gain short-term and long-term profits.

- **Voting**

Token voting is one of the most popular methods used by voters to represent their votes. Your ability to vote increases with the number of tokens you own.
